

## Small Telescope Observing

### Rank the telescopes

1. In which telescope did the object fill the field of view the most (object appears big)?
2. In which telescope did the object fill the field of view the least (object appears small)?
3. In which telescope was the object the brightest?
4. In which telescope was the object the dimmest?
5. In which telescope could you see the most detail?
6. Choose the telescope that you feel presents the BEST view of the object and fill in your **observation form**.
